

Flexible Working

From empowering decision-making to embracing a cultural shift in the workplace

One size does not fit all

Technology is transforming how relationships with customers, employees and other stakeholders are forged and maintained. With five generations of employees at the workplace today and different regulatory compliance requirements, innovating workplace practices and technology choices can be a complex task.

For many businesses, fostering hybrid environments simply makes sense as it allows employees to transition seamlessly between our physical and digital worlds. At the same time, it addresses the varying needs and expectations of the five generations of employees in the workforce today - different working styles, different expectations for how they wish to collaborate and communicate with one another.

“Attracting and keeping the best talent requires me to read and predict what my super-connected, global workforce expects. Even if I get this right, it is a challenge to make my workplace proposition stand out from the crowd.”

– Chief Executive Officer

“It is increasingly difficult to keep up with new technologies, not forgetting BYOD options brought onboard by employees. It is a struggle to try to balance the rewards of flexible working and facilitating better team collaboration with the risks that these new technologies bring.”

– Chief Information Officer decision maker

“How do I ensure Human Resources policies and practices align more closely with expectations of business stakeholders and employees I serve? Is it possible to use technology to ensure productivity, employee engagement and collaboration is kept at an all-time high?”

– Human Resources Manager

Business requirements	Business impact
Collaborate effectively anywhere, anytime	<ul style="list-style-type: none">• Access information needed anywhere, anytime without compromising on policies governing who has access to the content, and storage platform.• Ability to share content with colleagues/customers in the format and manner they prefer to receive it.• Bridge geographical divides and foster better team outcomes.
Employee engagement and empowerment	<ul style="list-style-type: none">• Make more informed, faster decisions with access to information anytime, anywhere.• Always ready, able and empowered to serve customers and stakeholders.

How Fuji Xerox can help you handle your Flexible Working Scenarios

Before

Employees away from the office, or travelling on business, do not have access to corporate information – but are still expected to respond to urgent queries.

02

Employees cannot find relevant information, causing delays in responses to customers.

01

Internal applications, like insurance forms and purchase orders, can't be approved.

03

Response times to customer requests, such as quotes and proposals, are too slow.

Solutions:

Cloud Package, Mobile Print and Scan, DocuShare, ApeosWare Management Suite

After

Just like having a virtual briefcase, users can access the content they need wherever they are – securely and conveniently via their mobile devices – and never miss an opportunity.

03

Always have the latest information (e.g. new promotions or updated customer data) to confidently engage with customers. Offer timely, relevant responses, even while on the move.

01

Collaborate seamlessly with colleagues – sharing documents on cloud storage services and search across services for documents.different cloud

02

Collaborate seamlessly with colleagues – sharing documents on cloud storage services and search across services for documents.different cloud

Fuji Xerox Cloud services allow you to be more responsive and relevant to customer queries. With this service, you can print from anywhere, anytime with Follow-You Print services, Share & Store documents in the cloud in order to facilitate content access whenever needed; view and optimize how print, scan, copy & fax services are used at the workplace anytime; and finally aggregate a search and upload content easily to leading 3rd Party Cloud services from your Multi-function Devices.

DocuShare is an enterprise content management platform that allow you to search and maintain comprehensive records of your customer interactions. Documents related to any customer are stored securely and centrally. With the mobile option, you can access the content on-the-go. To ensure you never miss an important interaction with your customer, you can use content rules or advanced workflow automation to simplify how operational activities like

reminders are triggered, and approvals and reviews are done.

ApeosWare Management Suite allow you to scan documents securely and accurately (with OCR feature) from your Multi-function Device to DocuShare or other content management platform for central storage and management. You can also maintain intuitive audit trails of document movements on your Multi-function Devices.
